

Smart Haul® + Dashcam, a winning combo for truckers!

Stack up the savings with Smart Haul + Dashcam! Truck customers with an electronic logging device (ELD) and a qualified dashcam(s) from preferred vendor Motive get additional savings on their insurance premiums. It's a win-win! Truckers save, and you get the business.

STACK THE SAVINGS

The best rate

New enrollments with qualified Motive AI dashcams will receive a 3% savings in addition to the Smart Haul savings of 5% – 20%. All vehicles on the policy must have an installed, qualified ELD and dashcam from Motive.

Safety adds up

Dashcams can encourage safer habits behind the wheel, help lower insurance costs, and reduce business risk for truckers. Ask your Smart Haul customers if they know about all the benefits of dashcams.

Smart Haul + Dashcam is only available in AL, AR, AZ, CO, CT, FL, GA, IL, IN, KS, LA, MD, MN, MO, MS, NC, NJ, NM, OH, OK, OR, PA, SC, TN, TX, and WI. Progressive will obtain the dashcam and ELD data directly from Motive. Customers with little to no driving data will receive the minimum ELD participation savings initially, to be reassessed at renewal once Progressive has collected enough data. Customers who provide sufficient data and demonstrate safer driving habits can receive greater savings. The minimum participation savings will be 5% for Smart Haul and an additional 3% with qualified dashcams.

HOW SMART HAUL + DASHCAM WORKS

Save more

Progressive Commercial customers enrolled in Smart Haul who purchased a Motive AI dashcam and subscription can receive an additional 3% savings on their insurance premium. Customers may be eligible for additional credits (or debits) at renewal.

Eligibility

The program is limited to risks that have an in-force Commercial Auto policy with Progressive and are enrolled in Smart Haul. Additionally, all vehicles on the policy must have an installed, qualified dashcam from Motive. The customer must have identified Motive as their ELD vendor during the Smart Haul enrollment process.

Enrollment is easy

Simply follow the existing enrollment processes to enroll in Smart Haul. Once enrolled in Smart Haul, no additional information needs to be provided. Customers with eligible dashcams installed will be identified and the savings automatically applied to their in-force policy. Note that the 3% dashcam credit will be applied after the customer has both enrolled in Smart Haul and installed dashcams on all vehicles listed on the policy.
